-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Claim Objections

Claims 5 and 13 are objected to because of the following informalities: In claim 5, "heat in generated" should be --heat is generated--. In claim 13, "said light" lacks clear antecedent basis. It is believed that claim 13 should depend from claim 12. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9,11,14-16,19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Unger in view of Schmidt.

Unger discloses in figure 8 applicant's basic inventive concept, heating only the periphery of an ice dispensing door using a looped electric heater, substantially as claimed with the exception of placing the heater in the door. Schmidt shows the placing of an electric heater into an ice dispensing door to be old in the ice dispensing art. It would have been obvious to one of ordinary skill in the art at the time of applicant's invention from the teaching of Schmidt to modify the ice dispensing door of Unger by placing the heater in the door to improve the efficiency of the deicing process by limiting heat which enters the ice storage enclosure (by not heating the enclosure). Since Unger shows a flange on the door and teaches the heating of the periphery, it is

considered obvious that the teaching of Schmidt could be applied to the flange of Unger to only heat the periphery.

Allowable Subject Matter

Claims 10,12,13 (if the above clarity problems are fixed), 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mawby et al and Yamamoto show ice door mechanisms. Grise shows a flexible heater. Smith shows the heating of the periphery of an opening of a refrigerator. Plumat shows a lighting and heating pane. Sterling shows a sensor light for a refrigerator electrical heater.
